

Date: March 20, 2020

Addendum #: 2

Project Name: Joint Use Inventory

Bid Due Date: Friday, March 27, 2020, at 11:00AM Eastern Standard Time

This addendum will answer any questions/clarifications submitted between the date Addendum #1 was posted and the deadline for receiving all questions/clarifications as stipulated in the RFP.

- 1. On the Optional Measurements: Is TCL&P looking for measurements to be recorded and delivered at every pole, or only record and deliver measurements when a clearance issue is identified?**

Only record and deliver measurements when a clearance issue is identified. However, this will play into the 98% accuracy requirements that will be field audited.

- 2. How many different vendors may be attached to poles?**

We have 12 different utilities on record across our entire service territory specifically detailed out in our existing GIS data, along with a couple more labeled 'Other' or 'Foreign Utility'.
