

REQUEST FOR PRIVATE AREA LIGHTING

For office use only Task #: _____

Traverse City Light & Power (TCL&P) offers Private Area Lighting to any customer desiring this service. TCL&P will install, own and maintain un-metered, photoelectric-controlled luminaires in mutually agreeable locations as required by the customer. Standard overhead equipment includes wood poles and non-decorative fixtures. A monthly charge for all luminaires and poles installed (unless an existing pole can be used for the installation) will be added to the customer's utility account. Where the customer desires underground wiring, TCL&P, at its option, will provide such facilities by special agreement. In addition, the customer agrees to furnish TCL&P with a trenchable route across their property, if needed, and agrees to restore any damage due to trenching at their cost. Initial minimum term is one (1) year for each installation. For current rates, please see the Private Area Lighting section of the Electric Service Rates book found on our website at www.tclp.org.

Address of Light(s): _____
